PROFESSIONAL EXPERIENCE

Venera AI

New York, NY

Machine Learning & AI Engineer

April 2022 – Present

- Achieved 70%+ of diagnostic accuracy by training and quantizing multimodal models with LoRA/QLoRA on Unsloth and GPUs
- Automated medical data translation process from 3 languages and extraction from ~2M medical records using PyTorch, OpenAI's Batch API, GPT models, and structured output with function calling to create Q&A datasets in Vietnamese for training and fine-tuning
- Scaled a universal benchmark/pipeline for a health companion product from 8 medical datasets and 10 models
- Introduced 25% faster performance by utilizing vLLM on HuggingFace Transformers for LLMs inference and deployment
- Conducted trainings for 10 team members on AWS migration, including Amazon S3, Redshift, EMR, QuickSight, and SageMaker
- Constructed a bot that tells health stories and recommendations to patients based on 4 different sets of time series data: sleep, blood pressure, heart rate, and glucose levels

Pegasystems

New York, NY

Data Science Intern

Sep 2023 – Dec 2023

- Optimized the data pipeline using PySpark, resulting in 50% faster execution time
- Refined the fingerprint tagging algorithm and improved its data mapping accuracy to 93%+
- Streamlined the process mining logic on insurance companies' screen logs from ERP/CRM to capture 72% more relevant workflow patterns

Pitney Bowes

New York, NY

Data Science Intern

Jun 2021 – Dec 2021

- Queried SendTech databases consisting of 100+ schemas on Snowflake by SQL for parcel scan data in various U.S. facilities to provide business stakeholders with data-supported visibility of the Pitney Bowes network
- Developed time-series regression models using backtesting on Python with an accuracy of 98%+ to alert of anomalies promptly, resulting in a 10% increase in business revenue
- Designed a live and interactive Power BI dashboard to visualize and update statistical metrics based on users' inputs

TECHNICAL SKILLS & CERTIFICATION

Programming: Python, R, SQL, C++, HTML, CSS, JavaScript, UNIX Shell Scripting

Tools: Oracle/Snowflake, MongoDB, Alteryx, AWS, GCP, Azure, Hadoop, Spark, Tableau/Power BI, MS Office, TensorFlow

Certifications: AWS Certified Machine Learning Specialty (in progress)

EDUCATION

Columbia University, Fu Foundation School of Engineering & Applied Science

New York, NY

MS in Data Science

Dec 2024

CUNY Baruch College, Zicklin School of Business

New York, NY

BBA in Computer Information Systems, Cum Laude with College Honors, Minor in Mathematics

Jul 2020

RESEARCH EXPERIENCE, PROJECTS & LEADERSHIP

Credit Card Fraud Detection | *Data Mining & Predictive Modeling*

- Performed exploratory data analysis and data cleaning, and constructed explanatory variables based on 1M credit card transactions
- Built predictive models by Python and R to detect credit card fraud with an accuracy of 75%
- Tested the correlation of multi-swipe and reversal transactions with fraud-likely ones, and prepared an executive summary for the division manager and stakeholders

New York City: Weather and Car Accident | *Data Engineering*

- Designed a data warehouse schema by defining KPIs, dimensions, and fact tables from 10+ data sources to show correlations between weather conditions and car accidents in New York City
- Established ETL plans for extracting and loading data into the schema by Alteryx, and populated it in Oracle by SQL
- Created a Tableau dashboard to display and incorporate the statistics and data representations

Ascend – Baruch Chapter

New York, NY

Assistant Vice President of Technology

Sep 2019 – Jun 2020

- Spearheaded an 8-week HTML/CSS and 10-week Python workshop to introduce programming to 50 members
- Attracted over 80 applicants and converted current members into Ascend's talent pipeline
- Streamlined the technology committee's internal workflow and communication by integrating Trello and Slack
