PROFESSIONAL EXPERIENCE

Venera AI

New York, NY

Machine Learning & AI Engineer

April 2022 – Present

- Achieved 70%+ accuracy and reduced GPU memory footprint by 40% by engineering multimodal diagnostics models and fine-tuning/quantizing LLMs with (Q)LoRA + Unsloth on multi-GPU clusters, cutting fine-tuning cost by 3x
- Generated ~2M multilingual clinical Q&A samples by designing an EHR-based data synthesis pipeline and standardizing training formats
- Automated multilingual medical data curation by building a PyTorch + OpenAI Batch API pipeline that translated and restructured records from 3 languages into instruction-tuning datasets through API-based tool chaining
- Measure model performance, latency, and token throughput across 8 medical datasets and 10 model families by developing a custom evaluation framework using vLLM, DeepEval, and YAML configs
- Optimized inference latency by 25% through integrating vLLM with HuggingFace Transformers for production chatbot deployment

Pegasytems

New York, NY

Data Science Intern

Sep 2023 – Dec 2023

- Achieved a 50% faster execution time by optimizing distributed ETL pipelines using PySpark and improving data partitioning techniques
- Boosted data mapping accuracy to over 93% by refining the fingerprint tagging algorithm and enhancing similarity scoring logic
- Detected 72% more workflow patterns by refining the process mining strategy and applying custom event correlation on ERP/CRM activity logs

Pitney Bowes

New York, NY

Data Science Intern

Jun 2021 – Dec 2021

- Designed SQL pipelines on Snowflake by querying 100+ schemas of parcel scan data across U.S. facilities for operational visibility to stakeholders
- Achieved 98%+ anomaly detection accuracy and drove a 10% revenue increase by developing time-series regression models in Python using sliding-window backtesting for early alerting and process optimization
- Enhanced self-service analytics by deploying interactive Power BI dashboards with real-time data refresh and dynamic DAX measures

TECHNICAL SKILLS & CERTIFICATION

Programming: Python, R, SQL, C++, HTML, CSS, JavaScript, UNIX Shell Scripting

Tools: Oracle/Snowflake, MongoDB, Alteryx, AWS, GCP, Azure, Hadoop, Spark, Tableau/Power BI, MS Office, TensorFlow

Certifications: AWS Certified Machine Learning Specialty (in progress)

EDUCATION

Columbia University, Fu Foundation School of Engineering & Applied Science

New York, NY

MS in Data Science

Dec 2024

CUNY Baruch College, Zicklin School of Business

New York, NY

BBA in Computer Information Systems, Cum Laude with College Honors, Minor in Mathematics

Jul 2020

PROJECTS & LEADERSHIP

Capital One – Credit Card Fraud Detection | *Exploratory Data Analysis (EDA) & Predictive Modeling*

- Uncovered key fraud indicators by performing EDA/data preprocessing on 1M+ transactions and designing behavioral/temporal features
- Achieved 75% accuracy by developing fraud detection models in Python and R using logistic regression, random forests, and gradient boosting
- Investigated the correlation between multi-swipe and reversal transactions using hypothesis testing, and presented executive-level findings with actionable fraud prevention recommendations to management and stakeholders

New York City: Weather and Car Accident | *Data Engineering*

- Analyzed weather-accident correlation by designing a cloud data warehouse and star-schema models on AWS Redshift from 10+ NYC datasets
- Automated ETL pipelines with AWS Glue, Lambda, and Step Functions for ingestion and transformation from public APIs and data lakes
- Enhanced query performance by 40% using PySpark on AWS EMR and built interactive visualization dashboards in Amazon QuickSight

Ascend – Baruch Chapter | *AVP of Technology*

Sep 2019 – Jun 2020

- Spearheaded an 8-week HTML/CSS and 10-week Python workshop to introduce programming to 50 members
- Attracted over 80 applicants and converted current members into Ascend's talent pipeline
- Streamlined the technology committee's internal workflow and communication by integrating Trello and Slack
